

DYNAMIC TEST IN MATHEMATICS FOR STUDENTS FROM 1 th TO 5 th GRADE	
Name	
Purpose:	To identify students who are struggling with mathematics to be able to give them good, adapted teaching program in the subject
Short description:	The test material consists of a compendium that contains two guidance parts. Part A: General guidance describing principles of dynamic assessment and giving some practical advice to anyone who will do a test. Part B: Guidance section for use by the test leader
Academic area/skills:	The test helps to find out how the student thinks when he or she works with the subject. It shows what the student masters without support, and further learning potential with the support of a competent adult
Target group:	Students from 1 to 5 grade; Teachers teaching mathematics
Survey method:	Individual
Standardization:	Not stated
Adapted/non-adapted to Norwegian conditions:	Norwegian original edition
Published:	2011
Author:	Svein Aastrup. Statped midt
User groups/user qualifications:	Teacher with good expertise about how children and young people learn mathematics. The person who will do a test should also have knowledge of what characterizes students with learning difficulties in mathematics
