

EVERYONE COUNTS. MANUAL FOR TEACHERS WHO TEACH MATHEMATICS/ALLE TELLER	
Name	
Purpose:	To be able to help teachers from the 1st to the 10th grade to diagnose better misunderstandings and misconceptions in mathematics through targeted tests and subsequent conversations with the individual student. The manual also aims to help teachers to avoid creating misconceptions when new concepts are introduced and to help students who already have misunderstandings
Short description:	The material Everyone counts includes written texts for the 1st to 10 th grade, guidance for the implementation and assessment of the tests, assessment form, and guidance for the student interview
Academic area/skills:	Guidance material and tests within numbers and numerical understanding
Target group:	Students in primary school
Survey method:	Individual or groups
Standardization:	Not stated
Adapted/non-adapted to Norwegian conditions:	Translated to Norwegian
Published:	2007
Author:	Alistair McIntosh; translated to Norwegian M.R.Settemsdal and I.M. Stedøy-Johansen
